

VRC

Condensate collection tank

The condensate collection tank (VRC) has been designed to collect condensate returning from the steam system team and to mix it with the make-up softened or demineralised water.

Entirely made of AISI 316 L stainless steel.

Provided with:

- supporting legs
- upper manhole, connections and fittings

Product complete with level float control.

Should it be necessary to use a level control with probes, electric panel and solenoid valve, choose model

VRC-V

Standard equipment

- Water replenishment valve with float in STAINLESS steel
- Level indicator
- Drain valve

VRC-V

Condensate collection tank

The condensate collection tank (VRC-V) has been designed to collect condensate returning from the steam system team and to mix it with the make-up softened or demineralised water.

Entirely made of AISI 316 L stainless steel.

Provided with:

- supporting legs
- upper manhole, connections and fittings

Standard equipment

Make-up feed water unit including:

- Water solenoid valve complete with wiring to the control panel
- Tank internal conveyor tube

Automatic conductivity probe level regulator including:

- Solenoid valve opening probe
- Solenoid valve closing probe
- Probe for alarm and low level signalling
- Probe for alarm and high level signalling
- Glass level indicator

Boiler control panel IP55 1/N ~ 230V 50 Hz
